Week 5 Status Report
Team 3
10/27/2021

Project Summary:

        Our project is coming along nicely. So far we have our schematic for the PCB designed and all of our components are working with example code.

Completed Tasks for the week:
1. VS code and PlatformIO installed.
2. Build the circuit on the breadboard.
3. Use example code to make sure the parts we have work
4. Some basic testing based on the current code.
5. Using Fusion 360, we made the schematic of the circuit
6. Started a GANTT chart to keep everyone on track.
